Summer 2022

## **F&B Communications** is bringing Fiber high-speed Internet to your home!

Fiber Internet is fast and dependable. F&B fiber connections can currently deliver up to a gigabit of unlimited bandwidth with the potential for even faster speeds in the future. Unlike wireless and other technologies, fiber Internet is not prone to interference. All of F&B's fiber cables are buried in the ground protecting them from storms and wind. We deploy systems with a dedicated fiber optic strand to each subscriber avoiding the "shared" network concept used by some providers.

This summer, representatives from our engineering firm, FARR Technologies, will be mapping out the area in preparation for our project. Representatives will be surveying the routes along the roadways to install our mainline fiber cable as well as assess for potential drop cable construction on your property. Based on the availability of materials and supplies for our project, we expect construction to occur during 2023 and 2024 with subscriber activation to follow.

**There is no cost to you or commitment to subscribe to our service to have the fiber optic cable installed to your home during the initial construction phase.** Prior to construction beginning on your property, you will be contacted to complete a construction acknowledgement form.

We encourage you to return the enclosed information card to our office so we can record your contact information and keep you updated as our project moves along.

We are excited about our network expansion in your area and look forward to potentially serving you.

**IF YOU HAVE ANY QUESTIONS, PLEASE FEEL FREE TO CONTACT US (563) 374-1236.**

Thank you!

# FIBER INTERNET IS COMING!

## **About F&B Communications**

F&B Communications, Inc. (F&B) has more than 100 years of experience as a local telecommunications provider. For the past 21 years, F&B has offered high-speed broadband Internet services to subscribers in western Clinton County and eastern Cedar County in Iowa. The network consists of more than 540 miles of buried fiber.

We are proud to be the areas premiere local telecommunications provider offering telephone, long distance, Skitter TV video, high-speed fiber Internet, and home security services to customers in the Bennett, Calamus, Delmar, Lowden and Wheatland exchanges and surrounding areas. The company also provides computer sales and service through their Technology Solutions retail division.

For more information and current service offerings, visit our website at **[www.fbc-tele.com/fiber](http://www.fbc-tele.com/fiber)** or call (563) 374-1236.
